

Ephorus plagiarism control

Validating originality in academic papers can be very difficult. With Ephorus plagiarism control, educators now have an effective tool for detecting and fighting plagiarism – all seamlessly integrated into their own Fronter Platform.

Ephorus plagiarism control uses public sources on the internet, and an ever-growing internal database of documents from your educational institution, to cross-check documents handed-in.

With Ephorus plagiarism control

Ephorus will automatically compare all work handed into the system with:

- Documents on the internet
- Other documents handed in by students
- Documents from other institutions using Ephorus

How Ephorus plagiarism control works

Hand-in folder - The Fronter hand-in folder is adjusted so that all work submitted is automatically scanned through the plagiarism control system.

Growing database - Each time the system is used, the database of documents and student papers for plagiarism detection is increased.

File formats - Plain Text, Word, OpenOffice, PDF and HTML files can all be scanned.

Plagiarism reports - Both teacher and student will receive an email report with plagiarism scan results.

For more information please visit fronter.com or contact your local Fronter office.

* Please Note: Ephorus plagiarism control is a Fronter PlusPack. You must already have a valid Fronter installation to subscribe.
