

Publish information from inside Fronter onto an external website or notice board, and enable online registration with Fronter webforms.

Allow others, outside the Fronter building, to read specific news, updates and messages. Integrate a Fronter webform on your external website, allowing automatic registration of participants in new courses/events/conferences at your school or organisation.

With Infofronter

Publish information

- Publish news, calendar entries and messages from inside Fronter onto external websites.
- Publish information from multiple rooms to one website, e.g. multiple newsfeeds are collected and published in one location.
- Allow several authors to contribute to information published externally.

Create webforms

- Set up online registration for events/conferences/seminars.
- Allow users to register online for an account in Fronter.

This is how Infofronter works

Infofronter user

- An Infofronter user will be registered in Fronter.
- This user's Today portal will be the page published to the external website.
- Customise the Infofronter user's Today portal to include all information to be published.

Fronter webform

- Create a Fronter webform linked to the relevant area in Fronter for new user registration.
- Include all necessary information fields in the webform.
- Publish the webform link to your external webpage.
